

## FELINE BETTER

Getting a new kitten is a very exciting experience. Having a cat from a young age allows you to give your cat the very best start in life.

We have designed our kitten health package to cover all your new arrival's routine care, saving you money and including everything we think is important for your kitten. All you will have to worry about is cuddling and playing with your new bundle of fluff!

The package is £275. This represents a substantial saving.

To continue providing optimal preventative health care for your kitten, we recommend following on with our adult package.

If you are interested in a package for your kitten, and would like more information, please feel free to contact the clinic team or take a look at our website.

Our preventative healthcare packages are not designed to replace your cat's insurance policy. The package is an excellent compliment to pet insurance for illness or injury.

## The kitten health package is a six month plan and includes:

- Full health check with the vet on several visits
- A course of three full vaccinations against flu, enteritis and Feline Leukaemia Virus
- Full review and advice on parasite control (worms and fleas)
- All prescription flea and worm treatment required
- Kitten pack with cat care information book and free gifts
- Neutering surgery – spaying for females, castration for males
- Implantation and registration of microchip
- Advice on feeding, socialising and training your kitten
- Discounts on Royal Canin kitten food, toys, Feliway® and dental products
- Discounts on additional veterinary consultations or emergency fees

We feel that getting off on the right 'paw' is crucial to your kitten growing into a happy and healthy cat.
